***Examiner's Amendment***

***Reasons for Allowance***

1. The present claims are deemed allowable over the commonly assigned references noted in the prior Office Actions since the previously noted references are commonly assigned and a terminal disclaimer has been filed to obviate the obviousness-type double patenting rejections.
2. The present claims are deemed allowable over the references of record since the references of record fail to disclose or render obvious a transparent, low-flammability, UV-resistant, biaxially oriented film comprising crystallizable thermoplastic as the principal component and the claimed UV stabilizer, wherein said crystallizable thermoplastic consists of PET, PBT or mixtures thereof and meets the claimed longitudinal modulus limitation after being heat treated for 100 hours at 100 °C.

While the prior art of record disclose the general concept of transparent, low-flammability, UV-resistant, biaxially oriented films comprising crystallizable thermoplastics and the claimed UV stabilizer, the prior art of record fail to disclose or render obvious a transparent, low-flammability, UV-resistant, biaxially oriented film meeting the claimed compositional limitations and also possessing a longitudinal modulus meeting the claimed property limitation. The Examiner notes that the longitudinal modulus is not an inherent property and does not necessarily correlate in a predictable manner between behavior at a lower temperature and behavior at 100 °C. As such, the Examiner deems that the claimed limitations are neither anticipated by, nor an obvious variant of, the prior art of record.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Examiner's Comments***

4. In order to better clarify the record, the examiner wishes to point out the reference cited (U.S. Patent No. 7,045,200 B2) has already been subject to a terminal disclaimer by applicants and is being cited to insure the completeness of the record.
